Annotation: This article explains the spirit of patriotism to the younger generation of today's new Uzbekistan and educates them in a loving and patriotic spirit with examples and the words of our President.

Keywords: Patriotism, the concept of homeland, family and culture, the concept of patriotism of young people, patriotic ideas.

Today in our independent and developing Uzbekistan to educate young people in a healthy and harmonious way, as well as to educate our youth in the spirit of patriotism and military patriotism, to realize their creative and intellectual potential, to bring them up as fully developed individuals created the necessary conditions and opportunities. Long-term training, national programs for the development of school education, state youth policy, established state awards for our boys and girls in various fields, built education facilities, work on the development of children's sports. All this will help the harmoniously developed generation, that is, the worthy successors of our future, is one of the measures aimed at educating the country's future enthusiasts. The question arises, what is patriotism? How are patriotism and similar births formed?

Youth is the future of our Motherland, our nation. As we entrust the fate of our country to them, first of all, they must have a deep understanding of the complex and responsible task entrusted to them, and make their contribution to it. After all, love for the Motherland, love for it is directly determined by the creative work of everyone in the development of this country.

Patriotism is an important source that determines the strength of the spiritual spirit. Patriotism is one of the deepest feelings formed over the centuries. Motherland is the past, present and future of a nation. It is his culture, spirituality, enlightenment, language, religion, character, ancestral heritage from his ancestors, pure blood from his ancestors, important stages in its history, in order to build a great state. is a struggle.

Undoubtedly, one of the greatest gifts of independence is the opportunity to study our true history, which is a mirror of our spirituality. In this regard, it is safe to say that the opportunity to study the life and military skills of our great commanders, who are the stars of our history, is a great happiness for professionals and researchers. During the quarter-century years of independence of our country, a number of scientific works and researches on the life and military skills of the great commanders Jaloliddin Manguberdi, Amir Temur, Temur Malik, Zahiriddin Muhammad Babur were carried out.

In particular, Amir Temur's life, military skills, and martial arts were studied and major works were published. The fact that Sahibkiran's life and military leadership skills are being studied today in several major scientific academies of the world, as a special subject in major military academies, not only makes us proud, but also encourages us to study Amir Temur's activities more thoroughly.

As the first President Islam Karimov said, "Amir Temur was first and foremost a great creative person. Who built the monuments in Samarkand, the monuments in Shakhrisabz? Who restored the Yassavi mausoleum in Turkestan? Can you tell us about the beautification and architectural works carried out in Afghanistan, Iran and India during the reign of Amir Temur and his descendants? Kim has adopted the universal, profound wisdom that "Power is in justice" as the guiding principle of his work. This is undoubtedly Sahibkiran." [1]

History will never forget that Sahibkiran saved the world civilization, first of all, the peoples of the East and Europe from the tyranny of Boyazid and Tokhtamishkhan, and established political stability in these lands.

The genius of Amir Temur is that, like all victorious commanders, he thought of the well-being of his country, the well-being of his people, and he never built a great power without greed for wealth. He introduced new methods in public administration policy and relied on the principles of justice [2].

The second half of the 14th century was a turning point in the socio-political life of the peoples of Central Asia. Because by this time the tradition of creating a strong centralized state system under the leadership of Amir Temur began. Amir Temur's high human qualities were focused on the implementation of the most important measures based on the prosperity of the country, the development of science, spiritual and socio-political progress [3]. This led to the harmonization of socio-political thinking in society, the principles of public administration policy and its implementation, the development of the kingdom, the doctrine of a humane society and a just ruler.

Amir Temur's state was ruled by seven ministers;

1. Minister of State and Citizenship. The minister has been informing the country about the day-to-day problems of the country's important affairs, the state's prosperity, the country's prosperity and the well-being of the population.
2. Minister of Defense. He managed the salaries and loneliness of the soldiers. The king was constantly informed of the state of the army so as not to fall into disarray.
3. The Minister in charge of the management of property belonging to the homeless, the dead and the fugitives, and the collection of zakat and duties.
4. The chief event is the minister in charge of the affairs of the kingdom. He is aware of the expenses of the treasury, as well as the expenses of the stable, which are the income and expenditures of all the kingdoms.

Ministers 5,6,7 A panel of three ministers in charge of border and subordinate affairs. That is, the prosperity or ruin of the kingdom depended on these ministers.

Today, it is important to bring up thoughtful young people, irrigated with the ideas of military patriotism. That is why each of our young people preparing for the defense of the Motherland must be brought up in the spirit of high patriotism.

Military patriotism is the spiritual basis of the life of every state and is manifested as the most important mobilizing force for the comprehensive development of society. As the President of the Republic of Uzbekistan, Supreme Commander-in-Chief of the Armed Forces Sh. Mirziyoyev rightly noted: "The continuous work on educating our youth in the spirit of patriotism is of great importance for us. Patriotism is the spiritual basis of the life of every state and is the most important mobilizing force for the comprehensive development of society" ¹.

One of the urgent tasks of today is to educate young people in the spirit of patriotism, to prepare them physically and spiritually for the defense of the Motherland.

Patriotism in young people, of course, is not instilled by itself. Homeland is a concept that embodies the human psyche, lifestyle, consciousness and thinking, past, present and future. The homeland begins at the threshold, at the corner where he was born and raised. Therefore, in the house where he lives and breathes, love and devotion to the mother earth, which is a magnificent and powerful place for him to grow up, must be eternal. Everyone's love for the Motherland is instilled in his body through breast milk, mother goddess and parental love. A child who does not love his parents, his ancestors, their traditions, customs, profession, does not love others. He is also proud of his nation, people, literature, art, religion and culture, inspired by the nature of the country where he grew up, and does not realize the value of its sacred soil. This is nothing but manicurism. After all, no one can find happiness outside the Homeland. A person who does not have a reputation in his own country is not valued in another country. The great thinker Alisher Navoi, Babur Mirzo,

Furkat and other ancestors lived far from their homeland with a strong longing for the homeland, smelt the soil of the motherland and the fruits grown in it. It is clear to all that they have suffered in the affairs of the country. Their spiritual experiences are the condition of a true patriot. A true patriot, no matter where he lives, will not leave him in the good or bad days of the Motherland, he will be with him. It is well known that Babur Mirzo, Furkat and other ancestors lived far from their homeland with a strong longing for the homeland, tasted the soil of the motherland, the fruits grown in it, and suffered in the work of the country. ayon. Their spiritual experiences are the condition of a true patriot. A true patriot, no matter where he lives, will not leave him in the good or bad days of the Motherland, he will be with him. The fact that Babur Mirzo, Furkat and other ancestors lived far away from their homeland with a strong longing for the homeland, smelled the soil of the motherland, the fruits grown in it, and suffered in the work of the country. ayon. Their spiritual experiences are the condition of a true patriot. A true patriot, no matter where he lives, will not leave him in the good or bad days of the Motherland, he will be with him.

The family is also a small country. Just as the prosperity of a country depends on its leader and people, so does the family. If every parent can gather his children every day and encourage them to love the Motherland for fifteen minutes, to serve the Motherland sincerely, to continue the glorious deeds of our ancestors, the children who grew up in this family will become true patriots. lib grows.

The expected result is to bring up the younger generation in the family on the basis of parental example, family traditions, family tree, profession, moral and spiritual values, to prepare them for family life through the formation of loyalty to the family, mutual love and respect will give. Forming a sense of patriotism in the hearts of the younger generation is the duty of every parent, educator, community to the Fatherland. Only a person who performs this duty with honesty, pure devotion and courage is a true patriot. The main task of every citizen, parent and community is to create a system of spiritual environment, spiritual activity, spiritual self-awareness and, on this basis, the formation of patriotic devotion in young people.

It is expedient to make a number of proposals on the formation of a sense of patriotism, military patriotism in the upbringing of children in the family.

- Parents should spend as much time as possible on the upbringing of their children, their mental state
- Going to family theaters based on the words of M. Behbudi "Theater is a school"
- Excursions to family museums, historical sites, historical monuments
- Creating a healthy family environment, national spirit and an enlightened lifestyle
- Be an ideological role model for children

- preparation for family life based on national and universal values
- Create the necessary opportunities in the family to develop the talent buds that the child has
- Talk more about military patriotism, legends, historical and artistic heroes as the family gathers around a table.
- Having Uzbek national musical instruments in every household, children growing up learning to play them, developing in a purely national spirit, etc.

Local self-government is an important and integral part of people's power in any democratic country. The humanitarian policy pursued by the leadership of our country is fully supported by the people of Uzbekistan. The greatest achievement of Uzbekistan in the formation and further formation of self-governing bodies was the approach to solving this problem from the point of view of restoring national traditions, values, choosing the path that meets the fundamental interests of the population. That is, in self-government, neighborhoods have been identified as the mainstay of governance. The mahalla is an important bridge connecting the citizens of Uzbekistan with the state.

We all know that the positive solution of issues of national security and peace, the education of citizens, especially the younger generation, to form a legally mature and harmonious, the formation of love for the motherland begins, first of all, with the family and the neighborhood. Community activists need to guide young men and women who are just beginning their youthful pride in finding their place in life.

Patriotism is the responsibility to the Motherland, the people, the family, the people and relatives, living in the interests of the nation, knowing and being proud of the history of their people, the material and spiritual heritage created by great ancestors. to pass on to future generations, to study the traditions, customs and heritage of our ancestors, to continue its valuable part, to sincerely feel the future of our state, the stability of independence, the greatness of the future, to build such a future. , the future of the motherland, its prospects, development, contribution to the nation's prestige, benefit, reconciliation, selflessness, honest work, concern for the glory and interests of the people, humanity, patriotism and so on. represents hundreds of similar qualities.[1]

A person who does not know his history cannot even build the future. Before gaining independence, the Uzbek people did not know their history, who their ancestors were, and the history of the Uzbek people was almost unknown. From the side of the first President of the Republic of Uzbekistan Islam Karimov, our people have achieved the long-awaited independence. This independence has given us back a lot, our monuments with a thousand-year history have been reconstructed, the names of our great ancestors have been restored. In recent days, international

journals about Uzbekistan have been published in international journals, as our country has attracted the attention of world scientists. This is one of the biggest and most memorable achievements for us.

If we look at the history, Oychechak, who gave birth to a brave son like Jalaliddin 800 years ago, was able to instill in the blood of her children not only breast milk, but also the breath of her country, love and longing for freedom. He brought up his sons and daughters with his gods in the spirit of devotion to the Motherland and love for the people. Jalaliddin's tragically completed life is engraved in the pages of history as an incomparable symbol of courage. He went to rescue his sister, who had been captured by the Persians in the land of Isfandiyar Khazar, and was taken prisoner himself. In prison, he was asked, "What do you want?" was asked. He said, "A handful of soil and a sip of water of my homeland." It is clear that the sense of patriotism is inherited from our ancestors. This is our history of courage, patriotism, The Resolution of the Cabinet of Ministers of the Republic of Uzbekistan dated February 23, 2018 on the approval of the concept "Education of youth in the spirit of military patriotism" was adopted. In this concept, the issue of educating young people in the spirit of military patriotism is considered as an integral and integral part of the integrated education of a physically and spiritually healthy generation, and President Shavkat Mirziyoyev Miromonovich called for the development of the Republic of Uzbekistan in 2017-2021. Particular attention was paid to improving the national and international best practices in accordance with the requirements of the "Strategy of Action" in line with the real socio-political changes in the life of Uzbekistan today. To protect our Motherland like the apple of our eye,

Educating young people in the spirit of military patriotism is able to instill in young people, regardless of nationality, language and profession, a sense of devotion to the Fatherland, to fulfill their civic duties and constitutional obligations, to form a legal consciousness and legal culture, to protect the interests of society and state. is a multi-level, systematic, targeted and coordinated activity of society and state bodies, public associations and other organizations to nurture as fully developed individuals in the field.

Educating young people in the spirit of military patriotism is an important stage in preparing our children to serve in the Armed Forces. Various forms and methods of education are widely used in military and patriotic education in all schools of the country. These aspects are used in the teaching of subjects such as "Sense of Homeland", "Etiquette", competitions in military sports among students, sports festivals, intellectual competitions, contests, quizzes. finds its confirmation. The role and significance of the national army in ensuring the territorial integrity, peace and tranquility of our Motherland It serves to inform students about the essence of the

ongoing reforms in the Armed Forces. Open lessons, meetings, creative evenings organized in various museums and other spiritual places, such as devotion to the Motherland, pride in our great ancestors, being a worthy child, preserving independence like the apple of an eye. serves to solidify ideas.

Of our President In his works "Building our great future together with our brave and noble people" the spiritual concepts of love, respect and reverence for the motherland are presented in a very broad and perfect way. Every citizen has a role to play in building a state with a well-developed legal and cultural consciousness. [3]

After all, many people have sacrificed their lives for this country, where we live. Every person living in our sacred land should consider the idea that the Motherland is one and the Motherland is one as one of his priorities, to inculcate it in the minds and thinking of the younger generation, to make it a vital need. After all, it is the sacred duty of each of us to love our heavenly motherland, to sacrifice for its prosperity, to protect and preserve its peace!
